Master in Oral Medicine
University of Gothenburg | Sweden
2015 - 2017

Language

Spanish 100%

English 90%

Swedish 80%

About me

I am an Associate Professor at CES University and a Visiting Researcher at the University of Gothenburg. My research is focused on the aetiology of oral lichen planus and its particular association with autoimmune thyroid disease, as well as on the role of the oral microbiome in the development of potentially malignant oral disorders and oral cancer. My private practice is limited to diagnosis and treatment of oral mucosal diseases, oral manifestations of systemic diseases, and salivary gland pathology.
